TECHNICAL PROJECTS

https://surya-xth1nkers.vercel.app
- My portfolio website for every other information.

https://nda-better.vercel.app
- A government website nda.in (Joint Defense Service Training Institute of the Indian Armed Forces) that I've chosen to improve.

https://nta-improved.vercel.app
- This is a better version of the National Testing Agency website, which I just improved!

- **70+ various Projects**
A Web 3 NFT buying / selling platform: Using motoko programming language
  - A platform build to buy / sell NFT using Dfinity (a web 3 tech)
  - Basic auth over selling and buying resulting in transferring of token and other verification which in-built Dfinity Internet provides us and build on those by credits of some free cycle of token for De-Centralized resources consumption.

- Started with a strong interest in video editing, leading to the creation of a YouTube channel named Th1nkers.

- Sold the Th1nkers YouTube channel to the Rockers (@lunaOnG) for Rs 21,000; videos are still available on YouTube under that channel.

- Faced a choice between pursuing high-end video editing or exploring other passions.

- Discovered a passion for creating meaningful projects without a clear direction initially.

- Transitioned into web development to channel creativity into something useful.

- Acquired skills in HTML5, CSS3, Javascript, ReactJs, NextJs, ExpressJs, NodeJs, MongoDB, API handling, GraphQL, and MySQL (SQL database).

- Engaged in numerous website projects and freelancing opportunities.

- Currently involved in personal projects aimed at improving government websites (e.g., NDA, NTA) as part of a mission to enhance online gov. platforms.
